**EMOTIONAL INTELLIGENCE, THE MISSING
INGREDIENT FOR LEADERSHIP SUCCESS..**

Self-awareness, awareness of others, authenticity, and trust, displaying resilience and being able to influence others’ emotions are fundamental to performing the functions of leadership effectively. Building emotional intelligence capability in yourself, greatly enhances your ability to influence others around you effectively and build more productive relationships with those you work with.

One of the most robust and consistent findings from organisational research shows there is a direct link between the way people feel and the way they perform at work. INSPIRE helps develop emotional intelligence competencies that increase levels of engagement, build resilience, reduce staff turnover, improve well-being, enhance productivity leading to increased profitability and market share.

“Only 26% of organisations invest in the development on EI skills..”

“Everyone goes to work with a smile on their face and returns home feeling valued and cared for.”
